

Setup Guide Speed Wi-Fi NEXT WX02

Getting Ready

Remove ① and ② from the packaging. Have your own device to hand.

1 Prepare the WX02

1. Remove the IC card from the card holder.

As shown in the diagram, remove the au Micro IC card from the card holder.

2. Insert the IC card into the WX02.

Insert the au Micro IC Card with its metal side down into the IC Card slot until it clicks into position.

Slide the battery pack with the recycling mark face up into the WX02.

Press the rear cover of the WX02 back on until it clicks into position.

3. Charge the WX02, and then turn it on.

Charge up the WX02, then hold down its power button for up to 5 seconds until it turns on.

Steps to making settings

Continue to **2** Make Wi-Fi connection to the WX02

2 Make Wi-Fi Connection to the WX02

A PC (Windows 8) Wi-Fi connection method

If using a tablet or smartphone, see the reverse of this sheet.

A-1
From the **Start** screen, select **Desktop**, and then click the network icon (task tray).
The Desktop shown on the Start screen.

A-2
In the **Networks** list, find a name (SSID) starting **WX02-** then click **Connect**.

A-3
Refer to the right-hand **How To Confirm The Network Key** chart and then, at the **Enter the network security key** prompt, enter the network key. Click **Next**.

How To Confirm The Network Key

- Gently press the WX02's **POWER** button to see the top screen.
- Press the **SELECT** button repeatedly until the 無線LAN情報 (Wi-Fi) Info screen is shown.
- Press the **SET** button to display the Primary SSID. Press the **SELECT** button to display the Primary Key.
- The text displayed is the Primary Key.

A-4
When asked **Do you want to turn on sharing between PCs and connect to devices on this network?** Select **Yes**, turn on sharing and connect to devices.

If the status of the **WX02-xxxxxxx** connection in the **Networks** list is **"Limited"** then settings to this point are complete.

Please continue to the reverse side for **3** Switch to English Display

2 Make Wi-Fi Connection to the WX02

If using a PC, please see the reverse of this sheet.

C iPhone / iPad (iOS) Wi-Fi connection method

C-1

Select the **Settings** icon, and then tap **Wi-Fi**. Turn Wi-Fi ON, and then select the network name starting **WX02-**.

C-2

Refer to A-3 **How To Confirm The Network Key** on the reverse side and enter the Network Key in the **Password** field, then tap **Connect**.

Refer to A-3 **How To Confirm The Network Key** on the reverse side for the Network Key (password).

C-3

If the **WX02-xxxxxxx** connection has a checkmark beside it then settings are complete.

Please continue to

3 Switch to English Display

3 Switch to English Display

1. Open a Web browser on the Wi-Fi device (e.g. smartphone) connected to the WX02.
2. Type **http://192.168.179.1** in the address bar of the Web browser and open the page.
3. Tap/Click on the **English** button.
4. Type in a password of your choice in the **パスワード** (Password) and **パスワード再入力** (Re enter) fields. Type the same password in both fields. This will be your administrator password for the WX02 device so please make a note of it so that you don't forget it. Tap/Click the **設定** (Apply) button.
5. Tap/Click on the **English** button.
6. You will be prompted to enter a login Name/User Name and Password. Enter as follows:
Name/User Name : admin
Password : The password you created in step 4 above.
7. Tap/Click the Sign in button. This will change the WX02's display to English.

4 Make connection settings

Step 1

Gently press the WX02's POWER button to see the top screen.

Step 2

Press the SELECT button repeatedly until the **Functions Maintenance** screen is shown.

Step 3

Press the SET button. **Remote Start** will appear. Press the SELECT button.

Step 4

APN is displayed. Press the SET button.

Step 5

Press the **SELECT** button. **Internet** is displayed. Press the SELECT button again.

Step 6

AN01 * is displayed. Press the SET button.
* To use a Fixed IP address, select **AN02**.

Step 7

Configured will be displayed.

The settings are now complete
