

ASAHI Net Secure Hosting

Next Generation Web Hosting with Flexibility and Advanced Features

Summary

ASAHI Net's Secure Hosting service consists of several virtual operating systems (OS) running on one server, and offers features and flexibility you'd expect from a dedicated server, at a reasonable price. Other than the hardware and network, each virtual OS is completely independent; resources such as the CPU, memory and network traffic are allocated evenly to each virtual OS. As a result, if a virtual OS on the same server has a very heavy loading, the resources available to the other virtual OSs are guaranteed and therefore will not be affected.

ASAHI Net's Secure Hosting service is suitable for those who have requirements such as:

1. "need root authority but don't need high loadings",
2. "want to use a dedicated server but want to control implementation and operation costs", or
3. "want a hosting service with high flexibility".

Charges

		Contract Type	
		Standard	Business
Initial charge ^{*1}	(A1)	5,250 yen	
Monthly charge ^{*2}	(B1)	4,725 yen	7,875 yen
Disk capacity		3GB	5GB
Host name (FQDN)		Desired subdomain.asaren.jp	

■ Optional charges when using the service with a virtual domain

Initial registration charge ^{*1}	DNS	(A2)	2,100 yen
	Domain	(A3)	6,300 yen
	Registrar Fee	(A4)	5,250 yen
Monthly charge ^{*2}	DNS maintenance fee	(B2)	525 yen

*In addition to the above, ASAHI Net will also charge for Business service handling fees, Internet connection Courses, etc.

*1. The Initial charge is made in the month the Secure Hosting service is configured for the user.

*2. Monthly charges will start from the month after the Secure Hosting service is configured for the user.

■ Charges and Conditions

Type of virtual domain	Apply for new domains	Transfer a domain used at ASAHI Net	Transfer domains from other hosting companies	Use domains registered with other companies
	Apply for a new domain using the Secure Hosting Service server.	Transfer a virtual domain you already own from ASAHI Net's virtual domain service to the Secure Hosting service server.	Transfer a virtual domain you already own from a different virtual domain service to the Secure Hosting service server, changing the registrar to ASAHI Net.	Use a virtual domain in use with another hosting service as the VPS host (assign a virtual domain host without changing the registrar).
Initial charge	(A1) + (A2) + (A3) 13,650 yen	(A1) + (A2) 7,350 yen	(A1) + (A2) + (A4) 12,600 yen	(A1) 5,250 yen
Monthly charge (Standard)	(B1)+(B2) 5,250 yen	(B1) 4,725 yen	(B1)+(B2) 5,250 yen	(B1) 4,725 yen
All-purpose .jp domain (.jp)	○	○	○	△ ^{*3}
Regional .jp domain (.co.jp, .or.jp, .ac.jp, .gr.jp etc)	○	○	○	△ ^{*3}
gTLD domain (.com, .net, .org)	○ ^{*4}	○	×	△ ^{*3}

*3 Please point the DNS servers for your virtual domain to the VPS Servers. For the details on how to do this, please refer to the service provider with which you have the virtual domain contract.

*4 ASAHI Net registers gTLD and Japanese.com domains through PSI Japan, Inc.; PSI Japan, Inc. is an official gTLD registrar in trust of ICANN (The Internet Corporation Assigned Names and Numbers).

For hosts of virtual domains registered and administered by ASAHI Net, the DNS servers will be registered as follows.

```
@                IN A IP address the Secure Hosting server
www.Virtual Domain name. IN A IP address of the Secure Hosting server
Virtual Domain name.   IN MX 10 www.Virtual domain name.
```

#Example (asahi-net.jp)

```
# @                IN A 220.157.254.133
# www.asahi-net.jp. IN A 220.157.254.133
# asahi-net.jp     IN MX 10 www.asahi-net.jp.
```

* If you wish to use a domain type that is not listed above, please contact ASAHI Net.

Details

		Standard	Business
Disk capacity ^{*5}		3GB	5GB
Guest OS		CentOS5	
Host OS		CentOS5	
Specification	root Authority	Available	
	Fixed IP-Address	1	
	DNS	Primary, Secondary	
	Remote control ^{*6}	SSH	
	Management Interface (GUI)	x	
	Anti-Virus software	x	
	SSL service (Network Certificate etc)	x	

^{*5} Users cannot have additional Disk capacity after the service starts.

^{*6} To operate remote control using Telnet is prohibited. If we observe the use of Telnet, we may stop providing the service.

■CentOS5 is used as the guest OS

The Linux distribution CentOS5 is an edited and re-compiled version of Red Hat Enterprise Linux's open source code based on its General Public License (GPL). The user community offers security updates, etc.

■Major Software Pre-installed (as of 1st May 2010)

In addition to the software listed below, you may install other software that operates on CentOS5 (XOOPS, MovableType etc.)

Software (Major Version)		Standard	Business
Remote (SSH)	OpenSSH 4.3		◎
Package Control	RPM 4.4.2		◎
	Yum 3.2		◎
WWW	Apache 2.2.3		◎
Email	Sendmail 8.13.8 or Postfix 2.3.3 ^{*1}		◎
	dovecot 1.0		◎
Mailing List	Mailman 2.1.9		◎
DNS	BIND 9.3.4		◎
Database	Berkeley DB 4.3		◎
	MySQL 5.0		◎
	PostgreSQL 8.1		◎
Programming	PHP 5.1.6		◎
	Perl 5.8.8		◎
	Python 2.4		◎
	GCC 34.1		◎

^{*1} Initially sendmail will be active.

* The content of the service may change without prior notice. Should there be a change in service specifications after service had opened, those changes will not apply to the servers already in use.

Technical Support

Documents that you can refer to for CentOS5

CentOS5 is a Red Hat Enterprise Linux-compatible distribution. You may use most Red Hat Enterprise Linux's commands, operating procedure and packages.

Support ASAHI Net Provides

The Secure Hosting Service is a special class of a dedicated server. Should a problem should occur, users are required to investigate and solve the problem. The support ASAHI Net provides is as follows:

- ...ASAHI Net will diagnose the problem, and if necessary, will provide support.
- × ...ASAHI Net does not provide support. Please refer to the manual etc provided by the maker of the software.

Physical details of the server

Investigate/solve hardware problems	○

Using the Service

■Implementation of security measures required

With the Secure Hosting Service, control over root Authority and the server applications for the virtual OS is independently offered to each user. Therefore, users are responsible for providing adequate security measures for the virtual operating system, while ASAHI Net will be responsible for the hosting server.

☞Linux in Japan http://www.linux.or.jp/en/index.html	☞JPCERT Coordination Center http://www.jpCERT.or.jp/	☞IPA Security Center http://www.ipa.go.jp/security/
--	--	---

■Appropriate settings for your software and program design are required

Voluntary settings and program design are required for various software. With the Secure Hosting Service, the resources of the host server are being shared by the virtual operating systems. Therefore, when it comes to using the shared resources, for smooth operation of the service, please voluntarily limit the value of throughput to the shared resources (the amount of data transfer / CPU usage etc.). If this is not done, the software's safety feature may turn the service off automatically when it detects excessive amounts of access or an overwhelming amount of emails being sent out.

■If running an Outgoing mail server (Postfix, Sendmail etc.)

(1) Protect your mail servers against Spam

ASAHI Net takes a stern attitude towards Spam. If users do not provide adequate countermeasure for Spam, there are cases where ASAHI Net will take action against Spam without prior notification.

☞Unsolicited Bulk E-mail Policy http://asahi-net.jp/en/agreement/spammail.html
--

(2) Use a port other than port 25 as your outgoing mail server

As a step to improve the security of our service, ASAHI Net has decided to implement Outbound Port 25 Blocking (OP25B). With ASAHI Net and other Internet providers implementing OP25B blocking, email sent from mailing software cannot get through the outgoing mail server's port 25. If you would like to run an outgoing mail server on the Secure Hosting service (Postfix, Sendmail etc), please configure your software to send email with ports other than port 25. We also recommend the combining of SMTP authentication and User authentication in order to prevent illegal acts (such as springboard attacks).

☞JEAG(Japan Email Anti-Abuse Group) http://jeag.jp/swg/op25b/
--

●Example : Submission Port + SMTP Authentication

Making an Application

■ Please apply for Individual membership before applying for the Secure Hosting service.

- To apply for the Secure Hosting service with the attached form you first need to be an ASAHI Net Individual member. Please visit our Web page to find out more about ASAHI Net Individual membership or call us in English. It is possible to apply for ASAHI Net membership on-line or by phone, in English.
- ASAHI Net membership is available from 315 yen/month (our Dial-up Course K1 Plan).

■ Please consent to our membership agreements before applying for the service.

- On making an application, members agree to ASAHI Net's membership agreements.

☞ Individual Member Service Agreement
<http://asahi-net.jp/en/agreement/individual.html>

☞ Commercial Home Page Service Agreement
https://asahi-net.jp/en/agreement/hp_corp.html

☞ Prohibited Behavior
<https://asahi-net.jp/en/agreement/prohibit.html>

■ Time required for completion of the registration process.

After the registration process is completed, ASAHI Net will send an email notifying you of the completion to the email address you supplied on the application form.

If you apply to use a subdomain (.asaren.jp) for the server host name.

Registration time	Approximately 3 working days
-------------------	------------------------------

If you apply to use a virtual domain for the server host name.

	Apply for a new domain	Transfer an ASAHI Net domain	Transfer a domain from another hosting company	Use a domain registered with another company
Virtual domain	Acquire a new domain for use with ASAHI Net's Secure Hosting service.	A virtual domain you are already using with ASAHI Net's Virtual Domain service is transferred to the Secure Hosting service.	A virtual domain currently being hosted with another company's hosting service is transferred to the Secure Hosting service. The domain registrar will need to change to be ASAHI Net.	A virtual domain currently being hosted with another company's hosting service is transferred to the Secure Hosting service to be used as the VPS host. The domain registrar will not need to change to be ASAHI Net; the host will be split so it can be used with the Secure Hosting service.
Registration time	Approx. 1 month	Approx. 1 month	Approx. 1 month	Approx. 3 working days. *10

*10 In addition to the 3 working days required by ASAHI Net, the company with which the virtual domain is registered will need a few days to finish their processing. For details, please contact the company with which the virtual domain is registered.

Please complete all the parts outlined in bold below.

Personal information you supply such as your name, telephone number, fax number, email address and nature of your inquiry will be kept on record so that we can handle your inquiry. We will also use the information to enable us to promptly deal with future inquiries you may have. Your personal information is handled in accordance with our Personal Information Protection Policy

1. Your name, ASAHI Net User ID, etc.

What this form does

This form allows you, an ASAHI Net Individual member, to apply for ASAHI Net's Secure Hosting Service. If you are not a member, you may apply for membership on ASAHI Net's Web page or by phone (ASAHI Net's English Customer Support line).

Assigned Hostname

In the case of a subdomain, its form will take:

subdomain.asaren.jp

where *subdomain* is one of the three choices of subdomain you supply. If your first choice is not possible, your second and then third choice will be considered.

In the case of a virtual domain, you will have already acquired it. The domain types which can be used at ASAHI Net are:

- * General purpose .jp domains.
- * Attribute type and regional type JP domain such as /.co.jp / .or.jp / .gr.jp / .ac.jp / .ed.jp / .ne.jp etc.
- * gTLD domains such as /.com / .net / .org.

When using a subdomain

Please supply subdomain names in order from your first choice to your third choice. Subdomains can be registered using numbers, letters and (-) hyphens.
* Commas (,) and dots (.) cannot be used.

Important

Mistakes or missing information may lead to delays in processing your application. Please check the information you supply before sending this form to ASAHI Net.

Confirmation

After registration is complete, we will send you confirmation to the email address you supply on this form.

2. Host name (subdomain or virtual domain)

<input type="checkbox"/> Use a subdomain (.asaren.jp) as the hostname																	
Example				エー	ヨン	エス	アイ	キュ	エル	ゼロ	ジェ	キュ	イ	ビー	ナナ	Please enter in lower case.	
				a	4	n	i	9	r	0	j	q	1	b	7		
First Choice▶																	.asaren.jp
Second Choice▶																	.asaren.jp
Third Choice▶																.asaren.jp	
<input type="checkbox"/> Use a virtual domain name as the hostname																	
Domain Name▶												E.g. asahi-net.jp					
	<input type="checkbox"/> New Domain <input type="checkbox"/> Transfer from ASAHI Net <input type="checkbox"/> Transfer from other company																

3. Plan

<input type="checkbox"/> Standard Plan	Capacity	3GB	Monthly Charge	4,725 yen (4,500 yen base)
<input type="checkbox"/> Business Plan	Capacity	5GB	Monthly Charge	7,875 yen (7,500 yen base)

4. Contact information
